

Suits and Boots goes live

Suits and Boots goes live today - 26 September 2007.

With the evenings drawing in, and the days getting colder and wetter, what better time to start working on what we hope to be the best rainwear and wet weather gear website around.

We'll be working relentlessly over the following weeks to build Suits and Boots into your one-stop-shop for all things relating to rainwear and wet weather gear.

We try to appeal to professionals, industry, and consumers who need first class protection from the elements.
